

Druck's Test & Calibration range

Druck's Test & Calibration range has been developed to embody 45 years' experience and to utilise the most advanced technology to deliver the highest quality results.

Pressure calibrators

DPI610E & DPI610E-IS

Highly accurate and easy to use pressure calibrator with integrated pressure generation capabilities.

DPI611

Compact handheld pressure calibrator with integral pump up to 20 bar / 300 psi / 2 MPa

DPI612

The complete pressure calibrator with interchangeable pressure modules

Multifunction calibrators

DPI620 Genii & DPI620 Genii-IS

Field calibrator and communicator for pressure, electrical, temperature and frequency with the ability to expand as needs change

PACE Pressure controllers and indicators

PACE 1000

High precision pressure indicator for testing, monitoring and calibration

PACE 5000

Single channel modular pressure controller delivering high speed, high precision control with a range of test options

PACE 6000

Dual channel modular pressure controller delivering high speed, high precision control with a range of test options

Pressure indicators & gauges

DPI705E & DPI705E-IS

High accuracy pressure and temperature indicator with plug and play remote sensors

DPI104 & DPI104-IS

Digital pressure gauge combining precision and functionality in a compact, robust and simple-to-use package

Electrical Calibrators

DPI800 Series

Ultra-compact, simple to use range of tools for testing and calibrating, multiple process parameters with plug and play sensors

Calibration management software

4Sight2 Calibration Software

Our customised software solution to improve process efficiency and an effective calibration solution that can reduce defects

Dry block and liquid temperature calibrators

Dry TC 165/650

Incorporating the latest metal block and electronic control technology to offer a choice of precision bored well inserts to accommodate a wide range of test devices.

Premium Temperature Calibrators

Offering six units, high accuracy, high speed temperature calibrators, covering a range from -55°C to 700°C. Including four multifunction units (PTC165, 165i, 255 & 255i) and two include integrated measuring instrument (PTC165i/255i).

Calibrator accessories

PM620 & PM620-IS

Our portable and fully interchangeable pressure modules with screw in connection (no set up or tools required)

TERPS PM & TERPS PM-IS

Incorporating our unique range of TERPS resonant silicon pressure sensor technology. Providing up to four times greater stability and higher accuracy.

PV210, PV211, PV212 Hand Pumps

A variety of lightweight, rugged and durable hand pumps offering efficient pressure generation for a wide range of applications

PV 621 & PV 622 Pressure Generation bases

Self-contained pneumatic or hydraulic pressure generation stations for use with the DPI 620G series of Multifunction Calibrators

Air Data Test Sets (ADTS)

ADTS 500 Series

Our range of high accuracy and reliable Air Data Test Sets for a solution to any aircraft application

ADTS 405 MkII

Highest performance Air Data Test Set system with military and civilian applications

Druck Services

Calibration

Ensures that your instruments' specifications are maintained by suitable reference standards.

Repair

We know our instruments and can identify issues during calibration, limiting delays in repairs by third-party calibration houses.

Preventative maintenance

Replaces wear parts at a time that suits you and avoids unplanned downtime in future.

Upgrades

Provides access to enhancements and new functionality that increases the performance of your Druck instrument.

Druck pressure sensors range

We have a wide range of platforms that can be configured to meet the individual needs of your business, whether that be in Industrial or Aerospace applications. Our platforms are designed to be used directly or as the basis of a customised solution.

Configurable modular pressure sensors

UNIK family

UNIK5000

Configurable General Purpose Analogue sensor
A unique solution to your pressure measurement needs built to order on short lead-times.
Common configurations available from stock
For use in multiple industrial applications

UNIK5600 & 5700

5600 316L Marine Certified Sensor
5700 Titanium Marine Certified Sensor

UNIK5800

Explosion-proof for Oil and Gas applications

UNIK5900

Explosion-proof for Oil & Gas and Power Generation applications

Specialised pressure sensors

ADROIT6200

High performance, robust digitally compensated pressure measurement device with analogue outputs:
Performance to 0.02%
Pressure range 200 mbar to 350 bar
Total accuracy to 0.1%

Motorsport sensor series

On-race motorsport vehicle pressure sensors. Also used in UAVs and Automotive Testing applications. Including the Professional, Premium and Pinnacle sensor ranges.

1800 Series

17.5 and 25 mm packages
Applications:
Reliable measurement of liquid level

PTX 661 Hammer/Wing Union Transmitter

5kpsi, 6kpsi, 10kpsi, 15kpsi
WECO 1502/2202 connections
Field repairable (replaceable transmitter) for Oil and Gas topside applications

Digital pressure sensors

TERPS

TERPS 8000

Ultra high accuracy 0.01% FS
Applications:
Power generation
Aerospace test

TERPS 8100

Ultra high accuracy 0.01% FS
Applications:
Barometers
Aerospace test

DPS5000 Family

DPS5000 I²C

High accuracy 0.1% FS
Low Power
Applications:
Embedded sensor for OEM's and remote monitoring on gas and water pipelines

DPS5000 SDI-12

High accuracy 0.1% FS
Low Power
Applications:
Remote monitoring of water resources for system integrators

DPS5000 CANBus

High accuracy 0.1% FS
Fast response
Applications:
Automotive and Aerospace test
Industrial control

Aerospace pressure sensors

PDCR 300

General use for Aerospace Test
Pressure range: 0 to 35MPa absolute
All Stainless Steel 316L, 17/4PH
& INC 625

3000 Series

Amplified Aerospace Pressure
Transducers
High accuracy and stability
Wide operating
temperature range

3700 Series

Absolute, gauge and sealed gauge options available
Standard accuracy of $\pm 0.2\%$ FS
Applications
Accurate pressure measurements for use
in aerospace ground and flight tests
Suitable for Automotive test and many Industrial applications

Subsea pressure sensors

PTX300 Subsea Pressure Transmitter

Better than 0.1% accuracy
High reliability and excellent long-term stability
External/ambient pressure up to 300 bar
All Electron Beam welded construction

PTX400 Subsea Wellhead Pressure/Temperature Transmitters

Better than 0.05% accuracy
High reliability and excellent long term stability
Standard pressure ranges up to 690 bar,
temperature measurement -40°C to 150°C
External pressure to 3,000 mH2O

Modules & OEM

Modules

12.5 to 25 mm packages
Applications:
Process Pressure Transmitter
manufacture
Mass Flow Controllers

OEM

Our Engineering team are available
to customise our pressure modules to
meet your requirements
