# Machine Health
Powered by Augury

What if your reliability team could trust every insight from their condition monitoring system? Wouldn't it be great if they could have quality family time, knowing that the system prevents unnecessary downtime?

That's Machine Health: Artificially-intelligent prescriptive diagnostics for your semi-critical plant equipment.

Machine Health analyzes millions of condition monitoring sensors 24/7—alerting your team **well in advance** of failure, diagnosing root causes, and prescribing fixes.

Monitor ···· **Diagnose** ···· **Guide** ···· **Act**

From reactive firefighting to prescriptive diagnostics, at scale

Relieve alarm fatigue and achieve **dynamic** asset performance by **optimizing** planned maintenance and making **strategic** reliability improvements.

Drive a plantwide **responsive** asset strategy by letting your machines **talk to you**.

Did you know that 59% of chemicals manufacturers see downtime from mechanical problems?

Download the report and beat the odds with Machine Health!

Get there in weeks, not years

The only solution that drives results from day one, and achieves rapid digital transformation at enterprise scale.

4-6 weeks	Time to deploy Machine Health
99%	Detection accuracy
95%	Prescription accuracy on rotating equipment
1 week	Average Time to Value
>300%	Average ROI; Payback within months
